ECL304 - Skill Lab: C++ and Java Programming
Sem III
2021-22

Lab Number:	10
Student Name:	Kanishka Aware
Roll No :	13

Title:

1. Write a java program to implement Multiple Inheritance using Interfaces. Create an interface called Management with selectCandidate() method. Another interface called Department with allotSubject() method. Class called HOD will implements these two interfaces and define the methods and access them with valid objects.

Learning Objective:

Students will be able to implement multiple inheritance using Interface concepts

Learning Outcome:

- Understanding the abstraction concept and hiding of the unnecessary code using interfaces.

Course Outcome:

ECL304.4 1. Implement different programming applications using packaging.

Theory:

- **What is complete abstraction and how is it achieved in JAVA?**

Abstraction is a process of hiding the implementation details from the user, only the functionality will be provided to the user. In other words, the user will have the information on what the object does instead of how it does it.

Since all the methods of the interface are abstract and the user doesn't know how a method is written except the method signature/prototype. Using interfaces, you can achieve (complete) abstraction.

- **Explain multiple inheritance and how is it performed in Java?**

Multiple inheritance in Java programming is achieved or implemented using interfaces. Java does not support multiple inheritance using classes. In simple terms, a class can inherit only one class and multiple interfaces in a Java program.

Hence, Java does not support multiple inheritance using classes. But, we can achieve it using interfaces.

"A class can extend only one class but it can implement multiple interfaces."

For ex. This example is extending only one class A and implementing multiple interfaces i.e.

IB and IC. **class A{} interface IB{} interface IC{}**

class D extends A implements IB, IC{

}

**Output
Screenshot:**

```
Enter Candidate name:
Kanishka Aware
Enter Subject:
Dsd
Candidate Name : Kanishka Aware
Subject Alloted : Dsd

[Program finished]
```
